🧠 TECHICAL SKILLS

Markup Languages

Html - Css - Bootstrap - Scss

Making website Dynamic

JavaScript - JQuery - Ajax - ES6

Framework Frontend

Angular - React.Js

libraries

Angular Material - Rx.Js - Framer Motion

Programming Languages

C++ - C# - TypeScript

Database System

Sql Server

knowledge .net

asp.net core API - asp.net MVC

📖 COURSES

Web Development and React.Js,

Route Academy

2022 | cairo

Angular Development Cross Skilling,

(egypt fwd)

2022 | cairo

RESTful API with ASP.NET Core web API

2020 | Online Course | it share

Diploma for web development (Asp.net mvc5), New horizon

2019 | cairo

🌐 LANGUAGES

Arabic (Native) | English (A2)

🧩 SUMMARY & OBJECTIVE

Seeking a challenging and rewarding position where I can enhance my skills, expand my network and acquire experience to enrich my career development. I am highly motivated and extremely focused on improving myself alongside being beneficial to your entity.

🎓 EDUCATION

Bachelor's degree in faculty of computer and information system, Modern University for Technology & Information

2016 – 2020 | Cairo

- Department of Computer Science
- **Overall GPA:** 3.0 Very Good

📁 PROJECTS

Personal Portfolio, 2022 [🔗](#)

- Frontend portfolio build in **React.Js**, **Scss**
- Custom **Framer Motion** library for React
- Use **Sanity** to make data dynamically, modify data by Sanity platform
- The portfolio is considered to be full stack due to the use of Sanity
- Responsive design in all devices by **media query**

Product App, Native Javascript / 2022 [🔗](#)

- It is a simple system through which you can control the management of your store create product, delete, edit, search
- **Technologies**: (Html, css3, javascript, ES6, store data in localStorage)

Netflix movies, javascript, Angular, React.js / 2022

- Movies app get movies from TMDB show them pagination, user can search access DB, movies details and auth, validation login and register
- **Technologies**: Angular [🔗](#), React.Js [🔗](#), Native Javascript [🔗](#)

Keep Note, To Do List App / 2022

- **Native JS** [🔗](#): crud operations have been applied and saved data in localStorage and can the user do a search for his notes
- **React.Js** [🔗](#): auth login page and store data in DB, fetch data from API

E-Commerce website, Angular / 2022 [🔗](#)

- Responsive web design using **bootstrap** and **sass**
- get all data from the fake **API** store
- crud operations have been applied by **Angular**

Graduation Project, Parking Lot Automation System / 2019-2020

Successfully developed an online automated parking system (PLAS). That consists of a mobile app using an API (implemented by Asp.net core) based on an external Database (SQL Server), connected Hardware, and web application.

My Tasks

- **Design**: after analyzing the case in context diagrams and Data flow diagrams make an ERD design
- **Database**: build a database in SQL server to connect to all projects used in a mobile, web application, and hardware
- **Implementation**: .net developer (.net framework) web application frontend and backend
- **Technologies**: C#.Net, Framework: Asp.net MVC5 **Demo** [🔗](#)

👛 PROFESSIONAL EXPERIENCE

Freelance, Frontend Developer | UI Developer

Freelancing web developer with over 40 working hours

Start:04/2022
